PROFESSIONAL SUMMARY

DevSecOps Engineer with 6 years of experience automating Azure infrastructure and building secure, scalable cloud platforms using Terraform, Azure DevOps, and GitHub Actions. Hands-on expertise in Infrastructure-as-Code, Azure networking, Docker, CI/CD, and cloud security across multi-subscription enterprise environments. Committed to delivering standardized, reliable, and secure deployment solutions through automation and DevSecOps best practices.

WORK EXPERIENCE

Detroit Software Consultants India Pvt. Ltd

Gurugram

DevSecOps Engineer

May 2022 - Jun 2024

- **Provisioned** Azure networking, compute, storage, identity, and security resources using **Terraform** with reusable modules, parameterized variables, and dynamic configurations, deploying **100+ Azure resources** across **3 Azure subscriptions** and **5 environments**, reducing manual provisioning effort by **60%**.
- **Consolidated** common CI/CD logic into shared **Azure DevOps YAML templates** and **GitHub Actions reusable workflows**, allowing multiple application repositories to consume a single delivery framework while reducing duplicated configuration across projects.
- **Restructured** Infrastructure-as-Code delivery into independent **Terraform Plan, Security Validation, Approval, and Apply** stages using **Azure DevOps YAML**, parameterized templates, and variable groups, supporting **20+ infrastructure pipelines** across **3 Azure subscriptions** with standardized release controls.
- **Resolved** recurring Infrastructure-as-Code deployment failures by improving Terraform remote state management, backend configuration, approval workflows, and Azure authentication practices, increasing deployment reliability across enterprise Azure environments.

Testrinx Software Solutions

Noida

DevSecOps Engineer

Oct 2020 - Apr 2022

- **Strengthened** cloud authentication by integrating **Microsoft Entra ID, Managed Identities, Azure RBAC, and Azure Key Vault** across **3 Azure subscriptions**, securing **30+ application secrets** supporting **20+ delivery processes**, eliminating stored credentials while enforcing least-privilege access.
- **Created** shared **GitHub Actions** template libraries with workflow_call, allowing engineering teams to inherit consistent build, code quality, security scanning, and release configurations across **20+ CI processes** and **8+ repositories**, improving delivery consistency by **55%**.
- **Engineered** enterprise **Azure Hub-and-Spoke** networking using **VNet Peering, Azure Firewall, NSGs, UDRs, Private Endpoints, and Azure Bastion** across **3 Azure subscriptions**, **5 deployment environments**, and **100+ Azure resources**, improving network segmentation, secure connectivity, and administrative access while reducing public network exposure by **60%**.

PROJECT EXPERIENCE

Detroit Software Consultants India Pvt. Ltd.

Gurgaon

VOLKSWAGEN MIQ USA

Jul 2022 - Jun 2024

- Supported the cloud platform powering Volkswagen MIQ USA by delivering secure Infrastructure-as-Code, enterprise release automation, cloud networking, DevSecOps controls, and containerized application deployments across Development, QA, UAT, Staging, and Production environments.
- **Orchestrated** enterprise Infrastructure-as-Code releases using **Azure DevOps**, executing independent **Terraform Plan, Security Validation, Approval, and Apply** stages across **20+ delivery pipelines**, reducing release execution time by **38%** while improving deployment governance.
- **Reviewed** Infrastructure-as-Code pull requests to validate Terraform changes, security scan results, branching policies, and deployment readiness, ensuring production changes met engineering and security standards before approval

DCG USA

Sep 2022 - Dec 2023

- **Served as a primary reviewer** for Infrastructure-as-Code and application pull requests across **10+ repositories**, verifying implementation changes, security findings, deployment configurations, and release readiness before approving production merges.
- **Collaborated** with developers, QA engineers, cloud architects, and platform teams throughout **20+ release cycles** to troubleshoot build failures, deployment issues, and production incidents, ensuring timely resolution and stable application releases.
- **Orchestrated** application delivery using **GitHub Actions**, executing source checkout, dependency restoration, build, linting, security validation, artifact publishing, and environment-specific releases across **10+ repositories**, reducing release lead time by **45%**.

CHARLEE USA

May 2022 - Mar 2023

- Supported enterprise cloud operations for CHARLEE USA by improving Infrastructure-as-Code governance, deployment reliability, release validation, and production support across Azure-based multi-environment platforms.
- **Administered** Terraform remote state using **Azure Blob Storage**, maintaining isolated backend configurations, blob lease-based state locking, and environment-specific state files across **3 Azure subscriptions** and **5 environments**, reducing state conflicts by **50%** while enabling concurrent infrastructure updates for **6+ engineers**.
- **Validated** Terraform execution plans and infrastructure changes during release reviews, confirming dependency resolution, configuration accuracy, and deployment impact before promoting changes across **Development, QA, UAT, Staging, and Production**.
-

Testrinx Software Solutions

Noida

QA Engineer

Jul 2019 - Sep 2020

- Expanded responsibilities beyond quality assurance by contributing to Terraform-based infrastructure automation, Azure DevOps pipeline engineering, and Azure cloud provisioning initiatives, leading to an internal transition into a DevOps engineering role.
- Validated enterprise web applications by designing and executing functional, integration, regression, and user acceptance test scenarios, collaborating with cross-functional teams to ensure production-ready releases within Agile development environments.
- Analyzed application requirements, reproduced complex defects, and partnered with developers and business stakeholders to validate fixes, improve release quality, and reduce production issues through structured defect lifecycle management.

SKILLS

Cloud Platform: Microsoft Azure (Compute, Storage, Networking, Identity & Access Management, Azure Monitor)

Infrastructure as Code (IaC): Terraform (Modules, Remote State, Workspaces, State Management)

Version Control: Git, GitHub

CI/CD: Azure DevOps Pipelines (Classic & YAML), GitHub Actions, Azure Repo

Security: Microsoft Entra ID, Azure RBAC, Managed Identity, Azure Key Vault, Checkov, TFLint, TFSEC

Scripting & Automation: Bash, Python Scripting

Monitoring & Logging: Azure Monitor, Log Analytics, Application Insights

Collaboration & Agile: Agile Scrum, Azure Boards, Jira, Confluence

EDUCATION

HR Institute of Technology, Ghaziabad (UP)

Ghaziabad

B.Tech

ACHIEVEMENTS

Awarded the Star Performer Award at Detroit Software Consultants India Pvt. Ltd. for consistently delivering high-quality software releases, driving engineering excellence, and exceeding project quality, delivery, and customer satisfaction goals across enterprise engagements.
